

Type 3

### Come – Back Can Review

We create come-back can's to help demonstrate potential, kinetic, and elastic potential energy. Interpreting what is happening during the energy transfer is important. Use this Type 3 to describe how the come-back can works.

FCA's

1. Explain what happened when you pushed the come – back can. (20 points)
2. Use the following vocabulary words: kinetic energy, potential energy, elastic potential energy, mass, velocity. (20 Points)
3. No spelling or grammar mistakes. (10 Points)

Remember:

- Be sure you skip lines
- Answer all 3 FCA's
- Write your name.
- Review your work and read what you wrote back to yourself to make sure it is accurate.
